Spinal Anesthesia Needles

*Optional 25G-26G-27G-29G

ATRAUCOM®

- Multi-angle grinded tip with special bending
- Extra thin wall
- Atraumatic

PenPen® pencil point

- Perfect conic elliptical bevel enables easy access to desired location, without cutting or causing harm

Filtered Aspiration Cannula
It provides filtration of the anesthetic fluid aspirated from the ampule.
*Optional

QPen® quincke tip

- Quincke bevel shaped and smoothened by using state of the art technology goes into tissues easily.
- While perfect match of stylet and needle bevel prevents tissues to go in the cannula, angular tip prevents tissue damage.
- Crystal clear needle hub enables monitoring fluid flow and helps to keep CSF loss at a minimum level.
- Thin needle wall enables rapid and easy flow.
