**INQUIRY No.130005900 – Attachment No. 1**

The machine should meet the functionalities and technical parameters indicated below:

Technical Parameters / equipment	Required
1. Range of extruded wire diameters	7 mm – 40mm
2. Range of diameters of feedstock wire	9,5 mm optional 12mm
3. Average Productivity	Min. 750 kg/hr (for 9mm2 feedstock)
4. Maximum scrap process	5%
5. Take -up	1 pcs for max drum 3000mm
6. Pay-off	2 pcs for standards coils
7. Maximum of coil weight	2500kg
8. Feedstock cleaning system (mechanical)	For two pay-off (optional)
9. Quality control system for continuous product	Surface inspection using the eddy current method
<b>Additional requirements for the entire scope of the inquiry</b>	
✓ Subject of the Contract must meet all the applicable Health and Safety requirements that are in force in UE.	
✓ Operating Manual in Polish. Operators panel, description of function buttons in Polish
