SECTION IX - OTHER INFORMATION

The method of awarding points in the criterion: Criterion 1 - PRICE (C):

In the PRICE criterion, the contracting authority will award points on the basis of the contractor's declaration in the price quotation form.

The criterion will be assessed as follows:

In this criterion, the offer may receive a maximum of 40 points. Number of points in the above-mentioned the criterion will be calculated according to the formula:

$$C = (C_{\min} / \text{Ret.}) \times 100 \times 40\%$$

where:

Cmin - this is the lowest price among the offers subject to evaluation;

Cof. - it is the price proposed in the assessed offer;

C - is the number of points obtained for the price by a given offer.

Criterion No. 2 - DELIVERY TIME (D):

In the DELIVERY TIME criterion, the contracting authority will award points based on the contractor's declaration in the Offer Form regarding the delivery time (expressed in Months).

The criterion will be assessed as follows: Up

to 7 months - 45 points. (%)

From 7 to 8 months - 35 points. (%)

From 9 to 10 months - 25 points. (%)

From 11 to 12 months - 10 points. (%)

From 12 to 16 months - 5 points (%)

Criterion No. 3 - ENERGY CONSUMPTION (electricity):

In the ENERGY CONSUMPTION criterion, the contracting authority will award points on the basis of the contractor's declaration in the Tender Form regarding energy consumption.

The criterion will be assessed as follows:

The tender with the lowest value of energy consumption (MJ / km) will receive the highest number of points.

The remaining offers will be converted according to the formula below. The result will be treated as the point value of the offer in the "ENERGY CONSUMPTION" criterion.

$$ZE = (\text{lowest value of energy consumption from among submitted bids} / \text{value of energy consumption of the examined bid}) \times 5$$

Criterion No. 4 - CARBON DIOXIDE EMISSION (DW):

In the CARBON DIOXIDE EMISSION criterion, the contracting authority will award points based on the contractor's declaration in the Tender Form regarding carbon dioxide emissions. The criterion will be assessed as follows:

The tender with the lowest carbon dioxide emissions (g / km) will receive the highest number of points, the others proportionally less.

The number of points will be calculated according to the formula given below. The result will be treated as the point value of the offer in the criterion "Carbon dioxide emissions".

$$DW = (\text{lowest value of carbon dioxide emissions from among the submitted bids} / \text{value of carbon dioxide emissions of the examined bid}) \times 5$$

Criterion 5 - EMISSIONS OF POLLUTANTS: nitrogen oxides, solid particles and hydrocarbons (EZ):

Under the POLLUTANT EMISSIONS criterion, the contracting authority will award points on the basis of the contractor's declaration in the Tender Form regarding the emission of pollutants: nitrogen oxides, solid particles and hydrocarbons.

The criterion will be assessed as follows:

The tender with the lowest emission of pollutants expressed in g / km will receive the highest number of points, the remaining ones will receive proportionally less. The number of points will be calculated according to the formula given below. The result will be treated as the point value of the offer in the "Emission of pollutants" criterion.

$$EZ = (\text{lowest total value of pollutant emissions: nitrogen oxides, solid particles and hydrocarbons from among the submitted offers} / \text{total value of pollutant emissions: nitrogen oxides, solid particles and hydrocarbons from the examined offer}) \times 5$$

The contracting authority will award points in the above-mentioned criteria on the basis of the contractor's declaration submitted in the Tender Form. The evaluation of offers in terms of the criteria presented above will be made on a 100-point scale according to the formula:

$$S = C + D + ZE + DW + EZ$$

where:

S - is the sum of the points obtained; C

- points for the price;

D - points for the delivery time criterion; ZE - these

are points for the criterion of energy consumption;

DW - these are points for the carbon dioxide emission

criterion; EZ - these are points for the pollutant emission

criterion. Order completion date:

The contractor is obliged to complete the subject of the contract within 16 months from the date of the contract (the contract completion date will be determined on the basis of the contractor's statement in the Offer Form, however, it will not be longer than 16 months from the date of the contract).
